

NEW TREATMENT TRIAL FOR BIPOLAR DEPRESSION

Do you have bipolar disorder and are looking for something more than your usual treatment?

You are invited to join a preliminary study of the effectiveness and benefits of the Mangosteen Fruit Extract for people with Bipolar Depression.

The project aims to determine if an extract of mangosteen fruit will help to reduce symptoms of depression in those with Bipolar Disorder.

Involvement in this study will require you to take capsules that may or may not include the mangosteen fruit extract for a period of 24 weeks, in addition to continuing your usual treatment.

The substance is not expected to have any unwanted side effects and will be received free of charge at each monthly visit to your nearest participating clinic. Once enrolled in the study you will receive reimbursement of travel expenses up to \$20 at each visit completed.

IF YOU:

- are aged 18 years or older
- have a diagnosis of Bipolar Disorder
- are currently experiencing low mood and would like to be considered for participation in the study
- can attend appointments in either Melbourne, Geelong, or Brisbane
